ABOUT ME

I'm **Willy Prado**, web developer. I started my studies (self-taught) in web development in June 2019 and I have gained experience in HTML, CSS, JavaScript, React among others. I also have more than 5 years of experience in digital marketing; My best qualities are be passionate in what I do and learning something new every day because this improves my creativity. Right now I don't have work experience as a web developer and I know that there is many things that I have to learn, but, Lincy Gonzalez's Workshop motivated me to apply and I am eager to start my career as web developer with you.

PS: Here I leave a link to my website
